

THE I.D.E.A. SPACE presents A PROJECT BY PATRIZIA HERMINJARD

# (R)EVOLUTION

an interdisciplinary multi-media mash-up experiment in digital technology

## The (R)EVOLUTION Experiment

How does a digital work evolve through successive generations of collaboration by a community of participants? (R)evolution is an experiment in which an original film work is mashed-up creating a new generation of work from which successive generation can be created. The experiment will culminate with an installation of selected works exhibited at the Colorado College Edith Kinney Gaylord Cornerstone Arts Center.

Participants may mash-up the original work by adding or subtracting digital media using open-source or original film/audio material they have created. Mashed-up videos can reference any theme. Copyrighted materials should not be used.

The dance for films for (r)evolution were created as part of the DA 325 Dance and Digital Technology class taught by Patrizia Herminjard during block 8 of 2009.

## HOW TO PARTICIPATE

1. View movie(s) below.
2. Download movie(s) you want to mash-up by clicking on their respective links.
3. Once your mash-up is created upload it at <http://www.youtube.com/watch?v=84zWArVHN0Q> by clicking on "Post A Video Response" and then select "Upload a Video".  
In order to post a Video Response, you must have a You Tube account.  
**The deadline for all video uploads is March 22, 2010** (the first day of Block 7).
4. Check back here to see your film under the first generation films section entitled *Second Generation Films*.
5. Selected films will be presented in the Cornerstone Screening Room on **April 30th at 7:30pm**. Visit the final Installation during Block 8, April 19th– May 17th, 2010 in the Cornerstone Arts Center (main space) featuring selected mashed-up films.

Notification of acceptance into the Installation will be sent to your You Tube account inbox.
