

Allison K. Shaw

Doctor Shaw is currently an assistant professor of theoretical ecology at the University of Minnesota, whose research deals with migration patterns of organisms through the use of mathematical models and analytical simulations.

Brown University (Bachelors in Sciences)2006, Applied Mathematics-Biology

Princeton (Masters)2009 Ecology and Evolutionary Biology

Princeton (PhD) 2012 Ecology and Evolutionary Biology

“Leaks in the Pipeline” (2012) - While it is not her most cited article, it is one of the most interesting and noticeable uses of her research methods.
