

## **Executive Council Candidate Statement for Mohammad Mia**

I am running for student government because I believe CC is looking for a leader that can listen to the concerns of the student body, and understand how to translate these into events and amendments that address these concerns. The skills that I bring to my campaign are the willingness to listen, to seek out knowledge and opinions, and to synthesize various sources into a cohesive plan of action.

I envision a Student Government that works with a greater degree of transparency while developing a stronger college community. One method I hope will increase collaboration is to add a financial incentive for groups that collaborate with groups they previously have not collaborated with. This method will ensure that events are well funded, while also rewarding students for their innovation and community outreach.
