

**Summer Research  
Application Workshop  
Wednesday, December 8 at  
2pm  
(2nd Wednesday of Block 4)**

Are you interested in doing research next summer? Most paid off-campus research opportunities, including nationally-funded Research Experience for Undergraduates (REU) programs, have applications due soon after the new year. This means you should start thinking about your applications now!

We will have an in-person application workshop on Wednesday, 08 December at 2:00pm to discuss applications and work on resumes/CVs and personal statements.

Here is what you need to do BEFORE the workshop:

- 1) Make an initial list of programs you are interested in, along with required components of each application. What type of essays, how many letters, official or unofficial transcripts, etc.
- 2) Work on your resume or CV and bring a printed draft with you.  
(<https://www.coloradocollege.edu/offices/careercenter/applying/resume.html>)
- 3) Write down some thoughts about one of the personal statements or essays required for one application. We will work on our statements and resumes in groups.

These links should help your program search:
