

# FACT

Bars and parties  
present the  
**greatest risk** of  
becoming infected  
with COVID-19.

---

Alcohol, close indoor proximity, and distraction from safety are a dangerous mix. Alcohol gives you a false sense of security and loosens inhibitions. Removing your mask to drink or to speak loudly and close to others increases the chance of spreading respiratory droplets that may contain the virus. In addition, dancing and labored breathing, touching other people and contaminated surfaces, and sharing cups and glasses pose additional risks.

***You are in control of your own decisions.***

That's why it's so important to wear a mask, wash your hands frequently, and avoid large crowds. Limit your social circle to your roommates, your household, or just a few friends who practice healthy behaviors and good hygiene.

**COLORADO  
COLLEGE**

**Reduce the risk. Slow the spread. Care for CC.**

**Note:** Reducing the risk of a COVID-19 outbreak on the CC campus will take all community members practicing social responsibility. Those in violation of college safety and conduct policies may face severe consequences, including suspension, dismissal, termination, and/or removal from campus.
