Education

Ph.D. Atmospheric and Space Science, University of Michigan, August 2010

Dissertation Title: Identification of Atmospheric Mercury Sources and Transport Pathways on Local and Regional Scales

Doctoral Committee Chair: Professor Gerald J. Keeler (deceased)

Doctoral Committee Members: Professor Joel D. Blum, Professor Perry J. Samson,
Associate Professor Allison L. Steiner, Associate Research Scientist Frank J. Marsik

M.S. Atmospheric and Space Science, University of Michigan, April 2005

B.S. Atmospheric, Oceanic, and Space Sciences, University of Michigan, April 2004

Research Interests

My research uses ground-based and airborne measurements to investigate the chemistry, transport, and fate of mercury species and other trace metals, as well as ozone in the atmosphere. I use statistical and meteorological models together with measurements to distinguish between local, regional, and global emission sources of atmospheric contaminants. I primarily work on studies to identify the chemical mechanism for mercury oxidation and reduction. More recently I have also sampled mercury and other heavy metals in biological samples, including soil and feathers, in studies of biogeochemical cycling and toxin exposure. I am additionally interested in developing new measurement techniques, such as stable-isotope analysis, to study the biogeochemical cycling of mercury and other trace metals.

Professional Experience

Assistant Professor, Colorado College Environmental Studies Program, July 2015 – Present
Research Associate, University of Washington-Bothell School of STEM – Physical Sciences

Division, November 2012 – July 2015

Post-Doctoral Research Fellow, National Research Council of Italy – Institute of Atmospheric Pollution Research, December 2010 – October 2012

Research Associate, University of Michigan Air Quality Laboratory, May – August 2010

Graduate Student Research Assistant, University of Michigan, June 2004 – April 2010

Undergraduate Research Assistant, University of Michigan, January 2003 – May 2004

NASA Summer Institute on Atmospheric and Hydrospheric Sciences, NASA Goddard Space Flight Center, June – August 2002

Teaching Experience

Current courses at Colorado College:

EV431: Atmospheric Chemistry, 2020 – present.

EV333: Atmospheric Dynamics, 2019 – present.

EV212: Energy: Environmental Thermodynamics and Energetics, 2015 – present.

EV128: Introduction to Global Climate Change, 2015 – present; Colorado College Mediterranean Semester, Italy, Fall 2018.

Past courses:

EV431: Air: Atmospheric Physics and Chemistry, Colorado College Environmental Studies Program, 2015 – 2018.

BST 200: Introduction to Climate Science, University of Washington-Bothell School of STEM, Winter Quarter 2015.

AOSS 105: Our Changing Atmosphere, University of Michigan Atmospheric, Oceanic and Space Sciences Department, Graduate Student Instructor, 3 semesters, 2005 – 2006.

GS 341: Ecosystem Science in the Rockies, University of Michigan Earth and Environmental Sciences Department, Camp Davis Rocky Mountain Field Station in Jackson, WY, Graduate Student Instructor, Summer term, 2004 – 2009
